Chamindu Kaushalye

Software Engineering Undergraduate · Full-Stack Development

chamindu2052@gmail.com GitHub LinkedIn Portfolio

Profile

Third-year software engineering undergraduate at SLIIT, with experience building desktop and full-stack applications. Developed Fashion Shaa POS independently and contributed to farm operations and campus search workflows in team projects. Interested in software quality, backend business rules, and reliable delivery.

Education

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) Information Technology, specializing in Software Engineering
Third year · Expected graduation: 2028

Technical skills

Application development: JavaScript, HTML, CSS, React, Electron
Backend & data: Node.js, Express, ASP.NET Core, MongoDB, PostgreSQL
Engineering practice: Git, GitHub, REST API integration, validation, service-level testing

Selected projects

Fashion Shaa POS Solo development

Electron / Node.js / Express / MongoDB

- Developed the desktop application, backend, and retail workflows covering checkout, inventory, customers, suppliers, and reporting.
- Connected an Electron client to authenticated Express APIs and MongoDB; implemented role-based access and Windows packaging.

AgriAssist Team project · Member 4

React / ASP.NET Core / PostgreSQL

- Contributed farm tasks, irrigation scheduling, approval workflows, scheduling validation, and final workflow integration as Member 4.
- Worked on approval boundaries, schedule conflicts, and workflow validation within the team system.

CampusFind LK Team project · Search

React / Node.js / Express / MongoDB

- Built the lost-item search feature within a team campus lost-and-found application.
- Connected search to report discovery; broader reporting, messaging, and administration were team responsibilities.

Engineering interests

Software engineering and full-stack development; growing interests in quality assurance, DevOps, testing, and dependable releases.
