Professional summary

Third-year Software Engineering undergraduate at SLIIT seeking a software engineering or full-stack development internship. Independently developed an Electron, Node.js, and MongoDB retail system and contributed approval and search workflows to team applications. Brings practical experience across interfaces, REST APIs, data persistence, and validation, with an interest in automated testing and reliable releases.

Education

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) Information Technology, specializing in Software Engineering
Third year · Expected graduation: 2028

Technical skills

Frontend & desktop: JavaScript, HTML, CSS, React, Electron
Backend & databases: Node.js, Express, ASP.NET Core, MongoDB, PostgreSQL
Tools & delivery: Git, GitHub, GitHub Actions, REST APIs, Windows packaging
Quality: Business-rule validation, service-level testing, debugging, isolated UI fixtures

Selected projects

Fashion Shaa POS Solo development

Electron / Node.js / Express / MongoDB

- Independently developed a retail application connecting checkout, inventory, returns, customers, suppliers, and reporting for a clothing shop.
- Built an Electron client backed by Express REST APIs and MongoDB, with JWT authentication and role-based access for retail operations.
- Implemented barcode-assisted entry, cart calculations, discounts, and receipt workflows; configured Windows installer and portable build targets.

AgriAssist Team project · Member 4

React / ASP.NET Core / PostgreSQL

- Implemented Member 4 farm-task, irrigation-scheduling, and approval workflows across React, ASP.NET Core, and PostgreSQL.
- Added scheduling validation and integrated reviewed proposals into final workflows, addressing schedule overlaps and stale approval decisions.

CampusFind LK Team project · Search

React / Node.js / Express / MongoDB

- Built the lost-item search feature within a team application using React, Express, and MongoDB.
- Connected search to report discovery so students can locate relevant lost-item reports; contributed within a shared full-stack codebase.

Additional engineering work

Built and deployed a responsive portfolio through GitHub Actions and GitHub Pages. Verified project galleries, keyboard navigation, reduced-motion support, and mobile layouts from 320px to 1440px using Playwright.
